

José David Ismael Barrera Bernal

Senior QA Engineer · API · Test Automation · Accessibility

xfaramir@gmail.com · LinkedIn · GitHub

PROFESSIONAL BACKGROUND

Senior QA Engineer with over 7 years of experience in functional testing, quality assurance, test automation, and performance optimization. Proficient in JavaScript, TypeScript, Java, and Bash, with experience supporting large-scale software and gaming platforms.

Currently a contractor through Predikative, supporting Blizzard Entertainment within Microsoft Gaming on quality engineering, API testing, automation, and distributed services. Experienced in testing APIs and RPC services, event-driven systems, and data flows with Kafka and Protocol Buffers (Protobuf), and in building and maintaining automated suites with JUnit, TestNG, and Java-based frameworks.

I specialize in API testing, accessibility testing (WCAG and ADA Section 508), visual testing, and test automation. My toolkit includes Cypress, Playwright, Postman, JUnit, TestNG, Kafka, and Protobuf. I also bring performance testing with k6, OWASP-based security testing, and evaluation of LLMs and AI models. My FinTech experience includes a key role in the MVP launch of Tyba.

I contribute to user stories, requirements, and acceptance criteria, advocate for quality across the development lifecycle, and communicate technical results to stakeholders at every level.

WORK EXPERIENCE

Blizzard Entertainment August 2025 – Current

Accounts Team Lead · Contractor, Blizzard Entertainment (Microsoft Gaming)

Technical leadership for the Accounts domain, overseeing quality engineering across account and identity services. Design, development, and execution of functional, integration, regression, and automated tests using Java, JUnit, TestNG, Maven, Protobuf, Kafka, and Postman. Development and maintenance of automated test frameworks and CI/CD test suites, including API and RPC testing, service validation, defect investigation, and incident management. Led testing for account, identity, privacy, and data-related workflows across regions and environments, working closely with QA managers, developers, and product teams in Agile/Scrum.

Huge.Inc Current

Senior Quality Analyst

- Functional and acceptance testing, including manual and visual regression tests.
- Test plans and strategies; bug tracking to company standards; collaboration with HUGE offices worldwide.
- Accessibility testing for mobile and desktop apps (WCAG 2.1, ADA 508).
- Performance testing with k6 and JMeter; OWASP security testing and analysis.
- Delivered automation frameworks for backend and frontend; managed builds and deployments with GitHub Actions.
- Tested AI chatbots and evaluated large language models (LLMs).
- Code reviews, interviews, and mentorship.
- FinTech startup work, including Tyba; content and component testing on CMS platforms such as Contentful and Drupal.

Ultra.io Freelance

Senior Quality Analyst

- Blockchain and Web3 project: UI and API test automation for web, dApp, and desktop applications (Electron, Chromium), integrated into CI/CD pipelines.
- Contributed to test framework creation and optimization; wrote test plans and cases; regular regression testing.
- Investigated, documented, and tracked defects; tracked non-functional aspects (performance, usability, compatibility) and QA metrics such as defect counts and automated coverage.
- Involved in all SDLC stages to define requirements and design; took part in technical interviews for QA candidates.

Stack: Playwright, Puppeteer, Postman, Newman, TypeScript, JavaScript, Web3, EOSIO, GraphQL, MongoDB, Kafka, Kibana, Grafana, Gatling, GitHub, GitLab.

Amadeus IT Group March 2017 – January 2019

Quality Analyst

Designed test cases from customer requirements; incident management and data quality processes; STLC execution with JIRA, Quality Center ALM, and SOAP UI; automation with Java, Selenium, Maven, JUnit, and Katalon; Scrum and KPI reporting; basic web vulnerability checks, PCI compliance sessions, and JMeter performance tests.

Amadeus IT Group (Accenture · Experis · Manpower) March 2016 – March 2017

On-site support agent

End-user incident management for hardware and software; installations, moves, and changes; Cisco and Avaya VoIP configuration; Active Directory; Windows and Apple device support; printers, video conferencing, and metrics reporting.

Unisys (Susts Colombia) July 2014 – August 2015

Bilingual Help Desk Agent

On-site and remote support: equipment maintenance, operating system installation (Linux, Windows, OS X), applications, printers, switches and routers, backlog management, field coordination, call monitoring, and KPI reporting.

Sutherland Global May 2013 – April 2014

Bilingual Sales Consultant

Technical support, billing, and sales of AT&T residential products and services; report generation.

SITEL de Colombia (Sprint Nextel) June 2011 – March 2012

Bilingual Agent

Customer service, business applications (Siebel CRM, Citrix), and first-level hardware, software, and telephony support.

EDUCATION

Universidad INCCA de Colombia 2011 – 2018

Computer Science · Systems Engineer

SKILLS

- Automation: Playwright, Cypress, Puppeteer, Selenium, Katalon, Protractor, JUnit, TestNG
- APIs: Postman, Newman, GraphQL, SOAP UI, Kafka, Protocol Buffers
- Quality: WCAG / ADA 508, visual testing, k6, JMeter, Gatling, OWASP, BurpSuite
- Languages: JavaScript, TypeScript, Java, Bash, Node.js, C#, PHP
- Delivery: Git, Bitbucket, Jenkins, GitHub Actions, Docker
- Systems: Linux, Windows, macOS, VirtualBox, VMware, CCNA Switching and Routing

CERTIFICATIONS

- ISTQB Certified Tester Foundation Level (CTFL)
- Cypress and Playwright 101 · LambdaTest
- Mobile Accessibility · Deque Systems
- English B2 · TOEFL and iSpeak
- Full Stack Development · MinTIC / Fedesarrollo
- Testathon winner · Facebook Insights (Best QA issue runner-up)

LANGUAGES AND INTERESTS

Spanish (native), English (B2). Interests: competitive gaming, blockchain, AI, chess, football, reading. References available on request.
